# **CAPITAL IMPROVEMENTS ELEMENT**

**Part III-G: Support Documents** 

**Town of Southwest Ranches** 

#### CAPITAL IMPROVEMENTS ELEMENT

The purpose of the Capital Improvements Element is to identify the capital improvements that are needed to implement the Comprehensive Plan and ensure that the Level of Service (LOS) standards adopted in the comprehensive plan are achieved and maintained through at least the five-year planning horizon.

#### **Public Facility Needs**

## **Transportation including Mass Transit**

As identified in the adopted comprehensive plan, there are two arterial roadway facilities that are projected to operate below the adopted LOS standard over the five-year capital improvement planning time frame (20232-20276): Sheridan Street and Griffin Road. Both roadways are owned and maintained by Broward County, and as discussed in the comprehensive plan, Broward County MPO has developed a strategy to improve each of these facilities. The Town of Southwest Ranches has no capital responsibility for either roadway.

All Town owned and maintained roadways operate at or above the adopted LOS Standard, and are projected to continue to do so within the five--year planning period, except for Dykes Road (160th Avenue), which is currently over capacity at its intersections with both Griffin Road and Sheridan Street. Dykes Road is a two-lane regional collector spanning the Town from north to south (approximately 2.5 miles) that connects the densely populated cities of Miramar, Pembroke Pines and Weston, via the sparsely populated Town of Southwest Ranches. Within Southwest Ranches, the road functions as more of a conduit for extra-jurisdictional traffic and local residential access than it does as a local collector (as evidenced by only one full intersection bookended by two other jurisdictions, and the predominating one dwelling unit per acre residential future land use map designation of the corridor). The few properties within the corridor designated for nonresidential use (Community Facility) are developed, and the remainder of properties and the few streets feeding into Dykes Road are designated residential at one dwelling unit per acre, and thereby constitute de minimis impacts. Therefore, the Town does not plan to improve Dykes Road. Mass Transit facilities are provided by Broward County Transit.

## **Sanitary Sewer**

The 60-acre Coquina Commercial Center at the Town's southern boundary and the New Testament Church at the Town's northern boundary are served by the City of Sunrise sanitary sewer system. The City of Sunrise Utilities Department maintains a retail service agreement with these two locations. The only other properties served by

centralized sanitary sewer are within the Cooper City service area, which covers frontage properties on Flamingo Road at the Town's eastern boundary, and the Stone Creek at Sunshine Ranches neighborhood (eight single-family homes). Included in this service area are St. Mark's Church and Archbishop McCarthy High School. All other properties in the Town utilize private septic tank systems. The Town is not involved in any manner with sanitary sewer service and thus, has no capital expenditures related to sanitary sewer service.

#### **Potable Water**

The Town does not maintain potable water treatment or distribution facilities and thus, does not have any capital improvement expenditures related to the supply or distribution of potable water. At least 90 percent of the households in the Town of Southwest Ranches are supplied with potable water via an on-site domestic self supply system (private well). The remaining ten percent of households have the option to connect to public water systems, but do not need to. The City of Sunrise, and Cooper City maintain retail service agreements with properties connected to their systems located in the Town of Southwest Ranches, however, the Town itself is not involved in any manner with potable water service, and thus, has no capital expenditures related to potable water service.

The Town hereby adopts by reference the City of Sunrise 10-Year Water Supply Facilities Work Plan adopted on July 14, 2020, and the capital projects described therein for the purposes of ensuring adequate water supply to the limited number of properties served by the system.

The Town hereby adopts by reference the Cooper City 10-year Water Supply Facilities Work Plan adopted on August 25, 2020, as incorporated and adopted in the Infrastructure Element of its Comprehensive Plan and the capital improvement projects contained therein for the purpose of ensuring adequate water supply to the limited number of properties served by the system.

### Solid Waste

Collection and disposal of Solid Waste are the responsibility of contracted haulers and Broward County Solid Waste Division. The Town of Southwest Ranches maintains agreements with these entities to ensure that solid waste is collected and disposed of according to the terms of the contract and within all safety regulations. No public capital improvements are needed to maintain the adopted level of service standards. All agreements are currently up-to-date and will be continuously monitored as needed.

## **Drainage**

Primary and secondary drainage within the Town is the responsibility of two independent drainage districts, each with regulatory, taxing and bonding authority. The drainage districts are responsible for the establishment and maintenance of all primary and secondary canals within the Town, and review development permits for compliance with their respective LOS Standards, which the Town has adopted. Both drainage basins function at their respective adopted LOS Standards.

The Town has adopted a Comprehensive Tertiary Drainage Master Plan. This conceptual plan identifies the general pathways (swales and drainage easements) that stormwater uses to make its way to the canal system. The purpose of the plan is to speed the clearance of stormwater from streets and yards after major storm events. A principal means of implementing the plan is enforcing proper swale grading and driveway swale cross-sections when new homes are constructed and when driveways are added or regraded. The plan and the conceptual improvements it identifies are not necessary for maintaining the adopted LOS Standard, and do not impose a capital obligation upon the Town.

The Town may undertake targeted improvements from time to time when funds are available, in order to compliment drainage district canal improvements and to improve the drainage from storm events that exceed the design storm events for which the adopted LOS Standards are based. There are no existing or projected drainage LOS deficiencies identified in the comprehensive plan over the next five years.

### **Parks and Recreation**

The adopted parks and recreation level of service standard of the Town of Southwest Ranches is to provide six acres of local and community park land per 1,000 residents. Currently, the Town owns a total of 153.54 acres of park land. According to the adopted comprehensive plan, the demand for local and community parks and recreation facilities in the year 2019, the long-term planning horizon, will be 58.38 acres. The Town of Southwest Ranches far exceeds the adopted level of service standard. Therefore, no funding is included or needed in order to satisfy the adopted LOS Standard. Capital expenditures for parks and open space will be designated for ongoing improvements to existing parkland, including trials, picnic areas, boat ramps, and play areas.

#### **Schools**

The uniform, district-wide adopted LOS for each public elementary, middle, and high school within Broward County is as follows:

School Type A is a bounded elementary, middle or high school that has the equivalent of at least 10% of its permanent FISH capacity available onsite in relocatables. The LOS for School Type A shall be 100% gross capacity (including relocatables).

School Type B is a bounded elementary, middle or high school that has less than

the equivalent of 10% of its permanent FISH capacity available onsite in relocatables. The LOS for School Type B shall be 110% permanent FISH capacity.

The adopted LOS will be met within the short and long-range planning horizons, which is addressed by the Broward County School District's Five-Year District Educational Facilities Plan (DEFP). Any potential deficiencies will be addressed by the School Board in the annual update of the District's DEFP.

The School Board of Broward County District Educational Facilities Plan FY  $\underline{2022\frac{1}{232}}$   $\underline{20265/276}$  is hereby incorporated by reference.

# **Public Education and Public Health Systems**

## **Public Education Facilities**

There are no public education facilities within the Town of Southwest Ranches.

# **Public Health Facilities**

There are no public health facilities located within the Town of Southwest Ranches.

# **Existing Revenue Sources and Funding Mechanisms**

The Town of Southwest Ranches has established four revenue and expenditure fund categories: general, transportation, debt service, and capital. As common with most other local governments, the largest of these fund categories is the general fund which is used to pay for all personnel and operating expenditures. The transportation fund is used to pay for general road maintenance, traffic studies, traffic calming and other transportation-related activities. The debt service fund is established to set aside all money needed to repay debt issuances. Finally, the capital fund is established to pay for all major capital improvements that have a life of three or more years.

Below is an inventory of revenue sources, organized by fund category, which are available to the Town of Southwest Ranches.

### **General Fund**

As stated above, the Town's General Fund is the largest of four funds established by the Town. Fund revenues include taxes, franchise fees, licenses and permits, fines and forfeitures, charges for services, and other miscellaneous service fees. General Fund expenditures include all operating and personnel expenditures and the allocation of monetary reserves.

## **Transportation Fund**

Transportation Fund revenues include intergovernmental revenues which are made up of local option and gas taxes, revenue transfers from general funds, and unexpended

reserves from previous years. Fund revenues are typically dedicated to road maintenance activities, traffic studies, and other transportation-related activities.

### **Debt Service Fund**

The debt service fund was established by the Town to repay two issues of credit. The first is a 2001A Series Florida Municipal Loan Council Revenue Bond (30 years) issued to pay for the obligations and acquisition of certain parks and recreation land. The second issue of credit is a commercial paper loan agreement with the Florida Local Government Finance Commission to finance the acquisition of property for the Town's Capital Improvement Program.

#### Capital Fund

The capital fund was established to track and plan for all major capital projects of the Town. Revenues to pay for capital expenses typically come from intergovernmental revenues including grants, transfers from the general fund, and various lines of credit and bonding mechanisms.

# **ANALYSIS**

The element is based on the following analyses which support the comprehensive plan.

# <u>Current local practices that guide the timing and location of construction, extension, or increases in capacity of each public facility.</u>

The Town of Southwest Ranches reviews the impact of all new development on drainage, parks and recreation, and transportation facilities. It also coordinates with Broward County in the permitting process to ensure that all new development meets any adopted LOS standards of the county. The Town relies upon its comprehensive plan to identify any projected LOS deficiencies or needs for capacity increases. At this time, there are no deficiencies projected to occur in the five-year capital improvement planning horizon.

## Fiscal implication of existing deficiencies

As indicated in the section on public facility needs, above, there are no existing deficiencies in the Town of Southwest Ranches in which the Town is financially responsible. All the existing transportation deficiencies identified are to be funded and corrected exclusively by Broward County as indicated in the Broward County MPO Cost Feasible Long-Range Transportation Plan.

# Impacts of public education and public health systems on infrastructure

There are no public education or public health facilities in the Town of Southwest Ranches. As such, there are no impacts of these systems on the Town's infrastructure.

## **Timing of Capital Improvements**

The Town continues to schedule improvements so that they are available concurrent with the impact of development in accordance with Chapter 163, Florida Statutes.

# **Ability to Fund Capital Improvements**

The Town does not have any planned capital improvement projects needed to maintain adopted level of service standards. Shown in Appendix D is the five-year schedule of capital improvements (SCI) for facilities subject to concurrency evaluations. All capital improvements included in the table are enhancements to public facilities already meeting adopted level of service standards. The ability to fund these capital improvements is demonstrated in a balance of revenues and expenditures as shown in Appendices A and B.

# **Summary and Conclusions**

The Town of Southwest Ranches has successfully secured the public facilities needed through capital improvement planning to implement the comprehensive plan as currently adopted. There are no further capital improvements that need to be funded over the next five years in order to meet adopted level of service standards.
